ANIKA NORDIC**

TENTE

BETTER MOBILITY. BETTER LIFE.

ANIKA NORDIC – COMBINING AESTHETICS AND MOBILITY IN PERFECT BALANCE

A refined wheel that does more than just function – it completes the look of a design furniture piece and elevates aesthetics to the next level. The luxurious Nordic expression is here transformed into smooth mobility with uncompromising quality.

Anika Nordic is a reinterpretation of the classic Anika wheel, now featuring an exclusive metal cover that merges function and aesthetics in one elegant design. Created for top quality furniture with attention to both detail and overall harmony.

RENOWNED TENTE-QUALITY

Anika Nordic completes any piece of furniture with Nordic finesse. The wheel is available in three variants: black, chrome and raw – all in $\varnothing 55$ mm. The raw version can be painted in any desired color – for full visual integration.

Different dome diameters ensure a perfect transition to the furniture.

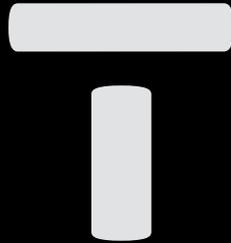

Anika Nordic combines quiet rolling with timeless and elegant design, creates a calm working environment and protects all floor types – from untreated wood to natural stone and carpets. The wheels require minimal cleaning and leave no marks – even after prolonged stand-still.

"We designed a cover that gracefully wraps around the wheel. The cover is thin and refined in a purely geometric expression. The neck to the pin blends beautifully into the curve of the cover and a subtle radius on the corners gives together with the smooth surface a soft and friendly design expression. The elegant wheel completes a beautiful piece of furniture in the best possible way."

Hans Thyge Raunkjær, Hans Thyge & Co, Designer and Owner
